ideavit

Misyonumuz; Our Mission;

İDEVİT markasıyla vitrifiye sektöründe kısa sürede lider firmalar arasında yerini alan ve 25 yıl garanti süresiyle bir ilki gerçekleştiren firmamızın misyonu ve vizyonu:

Teknolojik gelişmelere ve değişimlere uyumlu tecrübeli çalışanlarıyla, ergonomik ve kaliteli ürünleriyle, müşteri beklentilerini karşılamak ve memnuniyetini sağlamak, insana ve çevreye duyarlı üretimini geliştirmek ve yenilenebilir enerji kaynaklarını etkin kullanmak, İstihdamı artırmak ve ülke ekonomisine katma değer yaratmaya devam etmektir.

Taking place among the leading companies of sanitary ware industry with IDEVIT brand and breaking new ground with 25 years of warranty, our company's mission and vision:

- With experienced employees following technological developments and changes,
- With ergonomical and quality products,
- Meeting customer expectations and ensuring satisfaction.
- Developing human and environment-friendly production and using renewable energy sources effectively,
- Increasing employment and continuing to provide added value for national economy.

Vizyonumuz; Our Vision;

İDEVİT marka bilinirliğini artırmak.

Raising IDEVIT brand recognition.

Kurumsal kimliğimizi bayii organizasyonu ile bütünleştirmek.

Integrating our corporate identity with the dealer organization.

Müşteri beklentilerine uygun ürünler geliştirmek.

Developing products suiting customer expectations.

Teknolojik gelişmeleri takip etmek ve uygulamak.

Following and applying technological developments.

Çalışanlarımızın eğitimine önem vermek, süreçlere katılımlarını ve motivasyonlarını artırmak.

Caring about our employees' trainings and raising their motivation and participation to the processes.

Müşteri memnuniyetini sağlamaya yönelik karar verme ve uygulama süreçlerini daha da hızlandırmak.

Speeding up the decision-making and implementation processes for ensuring customer satisfaction.

Çevreyi korumak ve çevreyi korumaya katkı sağlayacak ürünleri geliştirmek.

Protecting the environment and developing products that helps to protect environment.

idevite®

Bugün kullandığımız kaynakları geleceğe taşıyabilmek ve bizden sonraki nesillere bu kaynakları kullanılır kılmak bilinciyle hareket eden firmamız; çevre dostu, insan sağlığına zararsız ve verimli enerji teknolojileriyle üretilen sürdürülebilir inşaat malzemeleri alanında Avrupa'nın önemli belgelerinden olan **Environmental Product Declaration "EPD" (Çevresel Ürün Beyanı)** sertifikasını alarak ileri düzeydeki çevre bilincini belgelemiştir. İDEVİT, ürünlerinin yaşam döngüsü boyunca Life Cycle Assessment **"LCA"** çalışmaları sonucu tüm çevresel etki ve performanslarını belirleyerek **EPD** Belgesi almaya hak kazanmıştır. Ayrıca global pazarlarda geçerli **EPD** belgelerinin kayıt altına alındığı **The International EPD System** ağında, Dünyada ve Türkiye'de, Seramik Sağlık Gereçleri sektöründe deklarasyonda bulunan ilk firma olma ayrıcalığına sahip olmuştur. İdevit firması ayrıca sektörde Avrupa Yapı Malzemeleri Üreticileri Birliği tarafından kurulan Eco Platform'da ürünlerini kayıt altına alan ilk Türk firmasıdır. Eco Platform, yapı malzemelerinde ürün sürdürülebilirliğinin sadece Çevresel Ürün Beyanı (EPD) belgeleriyle gerçekleştirilmesine öncülük etmek amacıyla kurulmuş olan bir organizasyondur. Çevreye ve topluma saygılı sanayici kimliği ile hareket eden İDEVİT, tedarik, üretim ve geri dönüşüm konularındaki hassasiyetini, ürünlerinin karbon ayakzini uluslararası seviyede onaylatıp Climate Declaration belgesini sunarak da göstermiştir. Climate Declaration belgesi, ürünlerin yaşam döngüsü boyunca iklim değişikliğine olan etkisini belirten bir belgedir. İdevit bu özelliği ile de bir ilke imza atmış ve Türkiye'de ve sektöründe bu deklarasyonu yapan İlk Türk firması olmuştur.

Knowing that it's important to carry the resources we use today to future and ensure these resources useable for next generations, our company has taken the Environmental Product Declaration **"EPD"** which is one of the important certificates of Europe for sustainable construction materials produced with environment-friendly, efficient energy technologies non-harmful to human health and certified its' environmental awareness.

As a result of Life Cycle Assessment **"LCA"** studies throughout their life cycle, IDEVIT has specified all the environmental effects and performances of its' products and gained the right to have the **EPD** Certificate.

In addition it has the eligibility of being the first company in World and in Turkey in sanitary ceramicware industry declaring in **The International EPD System** network where valid EPD certificates in global markets are taken under record.

In addition Idevit is also the first Trukish company that made its' products taken under record in Eco Platform founded by European Building Materials Association.

Eco Platform is an organization founded in order to keep product sustainability of building materials, only with Environmental Product Declaration (EPD) certificates.

IDEVIT, acting as an industrialist respecting the environment and the human, has made the carbon footprint of its' products approved at international level by initiating the Climate Decleration certificate and shown its' sensibility in supply, production and recycling.

Idevit is again leading the way in Turkey and in its' industry by being the first Turkish company which has initiated this decleration.

SURFACE TECHNOLOGY

21. yüzyılın ciddi bir problemi olan enfeksiyon kapma riskine karşı geliştirilen antibakteriyel özellik taşıyan ürünler bulaşıcı hastalıklardan korunmak adına bilinçli tüketicilerin tercih sebebi oluyor. Özellikle toplu yaşam alanlarında ortak kullanım alanı olan tuvaletlerin hijyenik olmayışı sebebiyle difteri, hepatit A- B, idrar yolu enfeksiyonu, grip ve benzeri bulaşıcı hastalıklara maruz kalmamak adına, antibakteriyel ürünlerin kullanılması sağlık açısından büyük önem teşkil ediyor. Antibakteriyel özellikli ürünler bakteri oluşumu ve gelişimine engel olduğu için ömür boyu koruma sağlıyor. Yüksek hijyenik özelliği sayesinde kolayca bulaşabilen hastalıklara karşı etkili olan antibakteriyel ürünler, bakteri oluşumuna izin vermiyor. Uygun ortam bulduklarında kolayca üreyip, gelişebilen bakteriler önlem alınmadığı takdirde tedavisi güç olan pek çok hastalığın kaynağı... Antibakteriyel ürünlerin tercih edilmesi, bulaşıcı hastalıklara yakalanma riskini en aza indiriyor. İdevit Seramik'in antibakteriyel sır ile sırlanarak geliştirdiği ürünleri kalıcı hijyen imkânı sunuyor. Ayrıca kimyasal temizlik malzemelerine ihtiyaç duymadan çok daha az su ile kolayca temizlenebilme özelliği sayesinde yüksek oranda su ve enerji tasarrufu sağlıyor. İdevit Seramik, doğal dengenin korunması bilinciyle tasarladığı antibakteriyel ürünleri sayesinde, tüketicileri doğa dostu teknolojilerle buluşturuyor.

Against the risk of infection serious problem of the 21st century, Therefore developed products with antibacterial features are the reason why conscious consumers prefer to be protected from infectious diseases. Especially in public areas due to lack of hygienic toilet with common places, Diphtheria, Hepatitis A- B, urinary tract infection, influenza etc. The use of antibacterial products is of great importance for health. Antibacterial products that provide lifetime protection to prevent bacteria growth . Due to its high hygienic and antibacterial products, which are effective against easily infectious diseases, do not allow the formation of bacteria. It is easy to breed when they find a suitable environment and the bacteria that develop are the source of many diseases that can not be cured if measures are not taken. Therefore, the preference of antibacterial products lowers the risk of getting infectious diseases. The products developed by İdevit Ceramic with antibacterial glaze provide permanent hygiene. It also provides high water and energy savings thanks to its ability to be easily cleaned with much less water without the need for chemical cleaning materials.

A dynamic splash of water with many small droplets and a central vortex, rendered in shades of blue and white.

Sert fırça ve kimyasal içeren deterjan kullanımına son!

End of hard brush and chemical detergent use ...

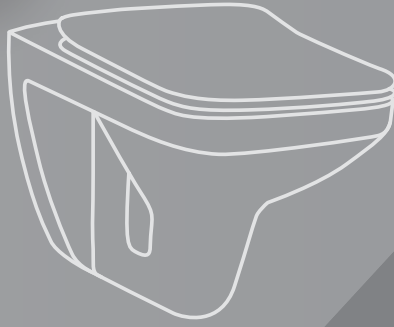

Easy clean teknolojisi sayesinde kimyasal kullanmadan kolay temizlik.

Easy cleaning without chemicals with the help of easy clean technology.

Banyonuzun hijyeni, ev halkının sağlığı için son derece önemlidir. Güvenilir ve hijyenik bir banyo için geliştirdiğimiz easy clean yüzey teknolojisi sayesinde özel sırla üretilen ürünlerimiz, kullanıldıkları süre boyunca, ekstra hijyenle bakterilerin üremesini engeller. Bu işlem için yüzeye uygulanan malzeme aşındırıcı kimyasal deterjanlar, kuvvetli asit-bazlar veya sert cisimler ile (fırça, keçe- li süngerler vb.) temizleme yapılmadığı sürece özelliğini uzun yıllar sürdürebilir. Yüzey kendiliğinden kolayca temizlenme özelliğine sahip olduğu için bu tarz temizleme işlemlerine ihtiyaç duyulmamaktadır. Kolay temizlenebilir özelliği sağlayan hidrofobik su itici ince ve görünmez film tabakası, bakterilerin yüzeye tutunma özelliklerini azaltarak yüzeyin hijyenik kalmasını sağlar. Temizliğe gerek duyulması halinde, yumuşak bir bez ve aşındırıcı özelliği olmayan bir sabun ile temizlik gerçekleştirilebilir.

Your bathroom hygiene is vital for your household health. For this reason, by means of the easy clean surface technology we developed for a more safe and hygienic bathroom, our specially glazed products, with the help of extra hygiene, will prevent bacterial growth during the time they're used. With this process, the material applied on the surface can maintain its' feature unless abrasive chemical detergents, strong acid-bases or hard objects (such as brush, felted sponges) are applied for cleaning. Because the surface has the feature to be easily clean itself, it doesn't require these kind of cleaning processes. If it's much required, cleaning may be made with a soft cloth and a non-abrasive soap. Thin and invisible hydrophobic water-repellent film layer providing the easy-cleaning feature, reduces the bacterial hold characteristic of the surface and ensures the surface is kept hygienic

reha

Yumuşak yuvarlak hatları ve zarif tasarımıyla Rena Serisi banyolarınızda sonsuzluğu temsil ediyor. İnce detayları ve şık tasarımıyla sıradanlığa meydan okuyan seri, konforu yeniden yorumluyor. Farklı renk seçenekleri sunanserinin favorisi ise kırmızı... Antibakteriyel, yavaş kapanır kapak alternatifleri ve gizli montaj özelliğiyle kusursuz şıklığı banyolarınıza getiriyor. Klozete entegre olan ankastre taharet musluğu sayesinde kullanım daha konforlu.

With its' soft round lines and elegant design Idevit Rena Series stands for the eternity in your bathrooms. Challenging the ordinary with its' fine details and classy design the series brings a new meaning to comfort. Offering various color options the favourite of the series is red... With its' antibacterial and hidden assembly features and slow closing seat cover alternatives it brings perfect classiness to your bathrooms. With the help of build-in bidet nozzle integrated into the closet which is also in other Idevit Seermic Series, the use is more comfortable.

Vega

İlhamını gökyüzünün en parlak yıldızı Vega'dan alan seri, kusursuz formu ve ışıltısıyla göz kamaştırıyor. Güneşe en yakın yıldız olan Vega'nın sıcaklığıyla banyolarınızda yaşam bulan seri, modern hatlarıyla sade ve kusursuz... Keskin ve net hatlara sahip güçlü görüntüsüyle dikkat çekiyor. Renk seçeneklerinin arasında siyahın büyüsunü tasarımında barındıran seri, yıllara meydan okuyor. Klozetlere entegre edilen ankastre taharet musluğu ile temizlik artık daha kolay.

Taking inspiration from the brightest star of the sky Vega the series is glaring with its' perfect form and glitter. With the warmth of Vega, the closest star to sun the series comes to life in your bathrooms with its' modern, simple and perfect lines... Having sharp and distinct lines the series is standing out with its' strong look. Having the magic of black among its' color options the series is defying the years. With the build-in bidet nozzle integrated into the closet the cleaning is easier now. The drain connection is universal and suitable for waste water outlet both from the bottom and back of the closet.

Venus

*Adını
güzellik tanrıçası
Venüs'ten alan seri,
sıra dışı geometrik formuyla
banyolarınıza romantik
bir ambiyans getiriyor. Banyolarınız
Venüs'ün görkemli ışıltısıyla parlıyor...
En çok tercih edilen ürünlerden olan
Venüs serisi geniş banyolar için ideal.
İki farklı kullanım için uygun olan lavabolar
tam ve yarım ayak olarak tercihe bırakılıyor.*

Taking its' name from the goddess of beauty Venus the series brings a romantical ambience with its' outstanding geometrical form. Your bathrooms are shining with the magnificent glare of Venus... One of the most preferred Idevit Seramic design Vega Series is ideal for wide bathrooms. Suitable for two different way of use the product is available as full and half-legged options.

Samanyolu

*Samanyolunun
uçsuz bucaksız
görkeminden ilham alınarak
tasarlanan serinin her bir parçası
kusursuz hatlara sahip.
Konfor, estetik ve işlevselliği bir arada
sunan seri, en çok tercih edilen koleksiyon olma
özelliğine sahip. Yuvarlak hatlara sahip olan ürün
abdest alma ünitesiyle de dikkatleri üzerine çekiyor.*

Designed by taking inspiration from Milkyway's immense glory each part of the series has perfect lines. Offering comfort, aesthetics and functionality together the series is the most preferred collection. Having round lines the product is also standing out with its' ablution unit.

Yogi

Hayvan figürleriyle çocukların beğenisini kazanan Yogi Serisi hem hijyenik hem de kullanımı kolay olarak tasarlanan ürünleriyle, çocuklara doğru tuvalet alışkanlığı kazandırmaları konusunda anne ve babalara yardımcı oluyor. Özellikle anaokulları ve kreşlerin ilk tercihi olan seri, tamamen miniklerin konforu düşünülerek tasarlandı.

Adored by children with its' animal figures Idevit Yogi Series, with its' products both hygienic and designed for easy use, is helping parents for their children to gain correct toilet habits. Especially the first choice of pre-schools and kindergartens the series is designed with little ones' comfort totally in mind.

Yeni nesil OSMANLI TAŞI

kanalsız,
hijyen,
ergonomik,
taharet musluklu,
hela taşı

Bilim adamları insan vücudunun çömelerek ihtiyacını gidermek üzere dizayn edildiği konusunda hem fikir. Yapılan bilimsel çalışmalar, daha rahat ve tam boşaltımın, hemoroit, kabızlık, bağırsak kanseri, sindirim hastalıkları ve rahim düşüklüğü gibi birçok rahatsızlığa engel olması konusunda ortak görüş bildiriyor.

Yaratılışımız gereği, boşaltım sistemimiz sadece 35° açı yakalandığı zaman tam olarak doğru çalışıyor. Bu açının tam oluşmaması durumunda tam ve doğru boşaltım sağlanamıyor.

Bu bilimsel analizin çıkış noktasıyla üretilen Hela Taşı, ergonomik yapısı ile sağlıklı bir boşaltım imkanı sunuyor.

Kanalsız hazne tasarımı ve antibakteriyel özelliğiyle de maksimum seviyede hijyen sağlayan ürünün ön bölümünde yer alan yükselti sayesinde, pis su ve idrarın sıçraması engelleniyor. Muhafazakar ve geleneksel yaşam tarzını benimseyen ailelerin özellikle tercihi olan Ergonomik Hela taşı Serisi, bel ve bacak ağrısı çekenler için de ideal bir tasarım. Üründe ayakların zemine temas ettiği bölge 13°'lik bir açıyla desteklenerek, doğru oturma biçimi kendiliğinden sağlanıyor. Standart hela taşlarının aksine bu üründe hela taşına entegre edilen taharet musluğu sayesinde kolay temizlik imkanı mümkün. Temizlik sırasında suyun akış hızının ayarlanabilir özellikte oluşu ise daha konforlu bir kullanım kolaylığı sunuyor.

New generation OTTOMAN SQUATTING

rimless,
hygienic,
ergonomic,
integrated faucet
squatting pan

Scientists are agreed that the human body is designed to squat for defecating. Scientific studies have made a consensus on the need for more comfortable and complete elimination of many illnesses such as hemorrhoids, constipation, bowel cancer, digestive disorders and low uterine activity.

For our creation, our discharge system works exactly when it only captures an angle of 35°. If this angle does not occur completely, accurate evacuation is not achieved.

Squatting pan, produced with the starting point of this scientific analysis, offers a healthy discharge with its ergonomic structure.

It also provides maximum level of hygiene with its rimless design and antibacterial feature.

The ridge that in front of the product, prevents the splash of water and urine.

The Ergonomic ottoman squattion series, which is especially preferred for families who adopt a conservative and traditional lifestyle, is also an ideal design for those with back and leg pain.

The area where the feet touch the floor is supported by an angle of 13° so that the correct seating is achieved automatically.

This design with faucet helps easier cleaning comparing to standart squatting pans.

Water flow rate can be adjusted during cleaning and provide more comfortable to use.
